## Texas mail-in voters: Don't forget this one step in ballot submission process.

Before you seal the envelope on your mail in ballot, be sure you fill out the areas highlighted above. Many ballots have been rejected due to failure to complete this information. The form marked in orange asks voters to fill in one box. We recommend you fill in both boxes to be sure the state can match an ID number to you that they have on record. Be sure to sign in the area highlighted in red then fold over the flap on the envelope and seal.
